

Honeyed Horizon

by Keri Anguiano Catching Stitches

Say hello to Honeyed Horizon, a vibrant fabric collection inspired by the changing palette of the horizon. Follow its journey through the day, from the soft greens of morning trees to the bright sky blues of midday. As the sun sets, warm honey-soaked hues take over, leading into the deep teals of twilight. Each fabric is like a snapshot of nature's most beautiful transitions.

With a mix of playful florals and cheerful geometric designs, this collection is perfect for bringing a fresh, modern vibe to your projects. Imagine stitching up the warmth of a summer sunset or the calm of an evening breeze—it's all right here, ready to be sewn into something beautiful.

Whether you're piecing together a cozy quilt or crafting a keepsake, Honeyed Horizon invites you to create, celebrate, and cherish the golden moments that make life sweet.

Meet Moda's New Designer

Keri Anguiano

Hello, I'm Keri Anguiano! Quilting has been my creative heartbeat for over a decade. For me, it's an art that stitches together joy, memories, and creativity. I proudly created Catching Stitches in 2013, where I write quilt patterns, curate special fabric bundles, and design fabric for Moda Fabrics.

I draw endless inspiration from Southern California's breathtaking landscapes—sun-kissed beaches, rugged mountains, and wild desert blooms. These vibrant backdrops spark ideas that I can't wait to weave into patterns. My goal is to create designs that bring joy to fellow quilters and celebrate the beauty of life's little moments.

Beyond fabric and art, I cherish my roles as wife and mom to six amazing kids. They often join me in the studio, where chaos turns into cherished memories. I'm a sucker for wildflower meadows, chasing thunderstorms across the desert, and embracing nature's adventures with my family.

So here I am, intertwining life's colorful patches: quilts, art, family, and the occasional lightning bolt—one stitch at a time. Join me on this journey; I promise it'll be a beautiful one!
